

**DATE:** September 23, 2025  
**TO:** Board of Education  
**FROM:** Board of Education  
**SUBJECT:** New School Build Motion – Southwest Latimer

---

**MOTION:**

**Moved By:** Trustee Fox

**Seconded By:** Trustee Dickinson

Whereas, the Langley School District No. 35 has now completed three modular structure additions to existing schools in the fast-growing areas of the School District, and

Whereas, each of the three additions has come in on time and on budget, and

Whereas, the construction timeline and construction cost from design to completion, has been significantly less than a conventional build model, and

Whereas, the need for new school facilities in the fast-growing School District continues to be evident and a significant need, and the Ministry of Infrastructure has identified in legislation a need to expedite critically important building projects,

Whereas, the Langley School District presently owns the property for the Southwest Latimer School site,

Therefore, I move that the Board of School Trustees, with senior management in attendance, request a face to face meeting (this may be virtual) with Minister Ma, the Minister of Infrastructure, to present and advocate for a proposal to complete a pilot project, of a fully functional 555 student modular elementary school build, on the property designated as the Southwest Latimer School.

**CARRIED UNANIMOUSLY**
